Garmin nuvi 500 free map update

as of September 30, 2011 Use Garmin Express to install this file. (9.20 MB) View system requirements Notes: WARNING: If this software is uploaded to a device other than that for which it is designed, you will not be able to operate that device. If attempts to upload software fail, you may need to return the device to Garmin® for service. Change History Changes made from version 4.20 to 4.30: Fixed an error that caused the device to generate inaccurate contour lines on NT Topo Maps. Fixed several routing errors. Changes made from version 3.90 to 4.20: Corrected an issue that could cause units with certain hardware configurations to repeatedly restart. Changes made from version 3.70 to 3.90: Improved accuracy of touchscreen calibration. Improved drawing of GB Discover marine maps. Corrected issue that could cause unit to remain stuck on copyright screen. Changes made from version 3.50 to 3.70: Fixes for displaying Arabic text. Changes made from version 3.40 to 3.50: Improve the way street suffixes are abbreviated Fixed issue with map freezing when approaching a Cyclops Camera Fixed issue with Arrival message being spoken twice Fixed issue with MSN Local Event Dates being cut off on button Improve JPG picture viewing Improved Geocache compatibility Changes made from version 3.30 to 3.40: Added Text To Speech support. After updating your nuvi 5xx, you must return to WebUpdater to install voices to enable Text to Speech. Improved G2 map compatibility by adding topmark display and the option to switch between IALA and NOAA icons, if supported by map. Improved highway avoidance behavior. Corrected issue when saving coordinates as a Favorite. Corrected issue where Optimally Reorder Points could cause final destination to be lost in some custom routes. Fixed some issues with handling certain Geocache files. Allow handling of maps larger than 2 gigabytes. Changes made from version 3.20 to 3.30: Improved Bluetooth performance on supported units. Improved performance with certain USB cables. Improved rasterized map performance. Corrected marine map display. Corrected custom routing issue. Changes made from version 3.10 to 3.20: Added Scooter mode. Added support for raster maps. Added night-mode elevation colors. Corrected issue with position datum being set incorrectly. Datum will be reset to default (WGS84). Changes made from version 3.00 to 3.10: Corrected an issue that caused incorrect translations to be used. Changes made from version 2.30 to 3.00: Once upgraded to this version, software downgrade is not possible. Allow diver selectable datums. Corrected shutdown issue associated with changing traffic provider. Allow American English voice to be downloaded via WebUpdater. Corrected shutdown associated with reading geocache logs. Improved demo mode initial setup. Changes made from version 2.20 to 2.30: Added support for MSN Direct using GDB-55. System requirements IBM-compatible PC running Windows 2000 or later operating system and an available USB port. © 1996-2014, Amazon.com, Inc. or its affiliates You're About to Unleash the Full Potential of Your Garmin nüvi 500! Don't Miss These Easy Tips to Supercharge Your GPS. Download ExpertGPS! ExpertGPS is GPS map software for your Windows computer, tablet, or laptop. ExpertGPS makes it easy to transfer waypoints, routes, and tracks, as well as GPS, GIS, and CAD data, to and from your Garmin nüvi 500. ExpertGPS gives you access to every topo map in the USA, as well as high-resolution aerial photos, so you can zoom in on any trail or job site. ExpertGPS even works with your own scanned maps, and data from over 100 different mapping, GIS, and CAD programs. ExpertGPS Home is an affordable outdoor trip planner at only $33/yr. ExpertGPS Pro contains all of the professional mapping features of high-end CAD and GIS packages, but without the steep learning curve and at a fraction of the price (now only $79/yr). Thousands of businesses and GPS users depend on ExpertGPS mapping software to upload and download Garmin nüvi 500 waypoints, routes, and tracks, make maps of their GPS data over seamless USGS topo maps and aerial photos, and convert and transfer Garmin nüvi 500 data to and from Excel, Google Earth, ArcGIS, and AutoCAD. We've collected dozens of tips and tricks designed to save you time and money when mapping with your Garmin nüvi 500. Browse Garmin nüvi 500 tips by category: Garmin Data Upload and Download, Map Making, Adding Waypoints and POIs, Tracklog Tricks, Coordinate Conversion, Google Earth and KML, ArcGIS and Shapefiles, AutoCAD DXF, Backing up your Garmin data, Geotagging your Photos, Downloading updates for your Garmin nüvi 500 Download a fully-featured trial of ExpertGPS, or buy your copy today. We're so confident ExpertGPS will save you time (as a GPS data downloader, coordinate converter, map viewer and editor, and GIS, CAD, and GPS data converter) that we make this guarantee: if ExpertGPS doesn't pay for itself in 14 days, we'll refund your money - and you can keep the software! Download now and start your free trial of ExpertGPS 8.08 New features were added to ExpertGPS on March 21, 2022 ExpertGPS runs on Windows 11, 10, 8.1, and 7. ExpertGPS can transfer Garmin nüvi 500 waypoints, routes, and tracks through your computer's USB port. It only takes a second or two to download all of the data from your Garmin using ExpertGPS. Upload new waypoints, routes, and tracks to your Garmin GPS Transfer data back to your Garmin nüvi 500 with a single click. Upload waypoints, routes, and tracks to your GPS and print a matching map out to take with you into the field. ExpertGPS even lets you upload Excel, Google Earth, CAD, and GIS data to your Garmin nüvi 500! Maximize your Memory Your Garmin nüvi 500 has limited storage space for waypoints, routes, and tracks. Once you reach that limit, your GPS can't hold any more data. Smart ExpertGPS users have figured out how to eke out every last bit of memory space on their Garmin GPS receivers. Before each outdoor adventure or visit to a project site, they use ExpertGPS to back up the contents of their GPS, and then clear the GPS data memory. They can then download as much data as possible onto their GPS (leaving some room for GPS data collection out in the field). When they get back, they use ExpertGPS to upload all of their Garmin waypoints, routes, and tracks onto their computer and save it. Once they've backed up the new data from their GPS, they can clear the memory again, keeping their GPS ready for their next trip. Backup your Garmin nüvi 500 waypoints, routes, and tracks Backup your nüvi 500 waypoints, routes, and tracks by using ExpertGPS to transfer them to your laptop or desktop computer. Now you've got a safe back-up of all of the important data on your nüvi 500, and use ExpertGPS to find and create new waypoints, routes, and tracks to download to your Garmin GPS. Before you update your Garmin nüvi 500 firmware or install a custom basemap, Garmin recommends that you backup all of your GPS data. ExpertGPS gives you the peace-of-mind that your Garmin nüvi 500 data is always safe. Making Maps from your Garmin nüvi 500 Data Real 1:24000 USGS Topo Maps View your Garmin nüvi 500 waypoints, routes, and tracks over USGS topo maps and aerial photos. These are actual 1:24000 scale topographic maps from the US Geological Survey, giving you much more terrain detail than the maps that came with your Garmin. Toggle between Topo, Aerial, and Color Orthophotos Instantly switch between topo maps, aerial photos, and color urban imagery using the T, A, and U keys in ExpertGPS. This ability to toggle back-and-forth between several views of your GPS data is unique to ExpertGPS, and is one of its most popular features. Give your maps a professional look ExpertGPS comes preloaded with all the line patterns and cartographic styles you need to draw highways, railroad tracks, transmission lines, streams, and more. And the waypoint and track style editors let you create your own map symbols, change track colors, and customize exactly how your GPS and map data is drawn. Boost your Garmin GPS data entry speed 500%! Why waste time entering new waypoints on the tiny screen of your Garmin nüvi 500? ExpertGPS can do it 5x faster! Use the New Waypoint dialog in ExpertGPS to create new waypoints and POI listings for your Garmin GPS. As you type, ExpertGPS automatically suggests the best possible name for this waypoint on your GPS. Calculating Area with your Garmin nüvi 500 Calculate Area (Acreage) using your Garmin nüvi 500 Calculate area with your Garmin nüvi 500. ExpertGPS automatically calculates the acreage of any parcel, field, or tract no matter how irregular, when you record the boundary with your Garmin nüvi 500 or trace it over the maps in ExpertGPS. ExpertGPS allows you to calculate acreage in three different ways: 1. Calculate area by walking a perimeter with your GPS. ExpertGPS calculates the acreage enclosed by your Garmin nüvi 500 tracklog. 2. Calculate area by marking GPS waypoints at the corners of a field or parcel. In ExpertGPS, connect those waypoints into a route, and the acreage is automatically calculated. 3. Calculate area by tracing over a map or aerial photo. Use the Track Tool in ExpertGPS to trace the property boundary or field, and let ExpertGPS calculate the number of square feet it encloses. ExpertGPS lets you get the most out of the waypoints on your Garmin nüvi 500 by making it easy to assign the best symbol and to give each waypoint a long, meaningful name (using a real keyboard, not the little controls on your GPS). Think about it: Your Garmin nüvi 500 can hold 500 waypoints. Waypoints on the Garmin nüvi 500 can contain up to 30 characters. Waypoint comments (notes) can contain up to 255 characters. How long would it take you to enter all of those waypoints by hand into your GPS? ExpertGPS will save you hours on this one task alone! Add Photos and Notes to your waypoints ExpertGPS lets you link a photo to any waypoint or POI and includes a built-in photo viewer. And you can add your own detailed description to any waypoint - store as much information as you need. Prevent Data Entry Errors with ExpertGPS GPS coordinates are easy to mis-type. Using the Waypoint Tool in ExpertGPS to create new waypoints reduces the chances of making a mistake when manually entering coordinates on your GPS. ExpertGPS takes care of all of the coordinate conversion and datum shifts when communicating with your Garmin nüvi 500, further reducing errors. Create routes the easy way! The Garmin nüvi 500 can hold 10 routes, each containing up to 250 turns or stops. ExpertGPS lets you build up long routes quickly - just click waypoints one-by-one on the map to connect them into a route for your Garmin nüvi 500. Route names on the Garmin nüvi 500 can contain up to 30 characters. ExpertGPS makes it easy to rename and organize your routes. Did you know you could trace roads, trails, and other features on the maps in ExpertGPS, and send them directly to your Garmin nüvi 500? This is a quick and easy way to keep you on-track when out in the field. Fix up GPS errors in your Garmin tracklog Poor GPS satellite reception can cause all sorts of errors in your Garmin nüvi 500 tracks. Use the advanced track editing tools in ExpertGPS to correct spikes and blips caused by intermittent GPS multipath errors. You can even select an entire segment of your GPS track and drag it right back to its correct location on the map! Tracklog Specifications for your Garmin nüvi 500 The Garmin nüvi 500 can hold 11 tracks. Saved tracklogs on the Garmin nüvi 500 can have up to 250 trackpoints. The active tracklog holds 99999 trackpoints. Track names on the Garmin nüvi 500 can contain up to 30 characters. Geotagging Photos with your Garmin nüvi 500 Save Hundreds of $$$ with Geotagging Software You can spend hundreds of dollars on dedicated camera hardware and cables to geotag your photos. Or, you can do it for free, using ExpertGPS. ExpertGPS automatically matches up the timestamps on your digital photos with the times recorded in your Garmin nüvi 500 track log. It just takes a few seconds when you get back to your desk to have ExpertGPS automatically geotag your photos. Share your Photos on Flickr and Google Earth Photos geotagged using ExpertGPS are 100% compatible with flickr.com, Google Earth, and any other geotagging software or Web site. Batch-Edit your Photo Metadata ExpertGPS lets you quickly view, change, or batch-edit your photo metadata. Select all the photos for the day, and quickly add the city, state, and location in which they were taken. Add and remove keywords and descriptions. View shutter speed, aperture, and other camera settings. Revolutionize the way you collect data in the field Still using paper forms, or typing data into your GPS piece-by-piece? With your digital camera around your neck, Garmin nüvi 500 in your backpack or in your vehicle, and ExpertGPS back at your desk, you can gather data on the move. There's no need to mark waypoints as you collect data - just snap photos at each site. ExpertGPS can create geo-referenced waypoints for your report from each photo you took along the way, and attach your photos to each waypoint it creates. Garmin nüvi 500 Coordinate Conversion Convert between any cartographic format or datum Need to convert NAD27 lat/lon to WGS84 UTM? ExpertGPS does it automatically. Enter coordinates in any format, in any datum. To convert Garmin nüvi 500 coordinates to any other format, just select that format in ExpertGPS. All of your data is automatically reprojected to the new format and datum. Convert to and from US State Plane Coordinates ExpertGPS Pro lets you work with data in any US State Plane Coordinate System (SPCS). Even though your Garmin nüvi 500 doesn't natively support SPCS, you can use ExpertGPS Pro to convert data back and forth between state plane coordinates, lat/lon, and UTM. Convert any address to latitude and longitude for your Garmin nüvi 500 ExpertGPS converts addresses to GPS coordinates with its built-in address geocoder. Enter any address in the US (or in several dozen other countries) and ExpertGPS will bring up a map of that location and create a GPS waypoint you can send to your Garmin nüvi 500. Locate property using PLSS (Township, Range, Section) coordinates The Go to TRS command in ExpertGPS Pro will take you directly to any township and range in 17 western US states, allowing you to locate land in the US Public Land Survey System quickly. As you move over the map, the current township, range, and section is displayed. ExpertGPS Pro can even overlay a PLSS grid from BLM or your state GIS department. Viewing Garmin nüvi 500 Data in Google Earth View your Garmin nüvi 500 data in Google Earth With ExpertGPS, you'll be able to view all of your driving trips over the aerial photos in Google Earth, showing exactly where you went. This feature is so popular in ExpertGPS, we've added a hot key (F7) that will automatically launch Google Earth and zoom in on your driving waypoints and tracklogs. And, we've also added the ability to download KML files back to your Garmin nüvi 500 Layering Garmin nüvi 500 Data with GIS Data Convert Garmin nüvi 500 waypoints and tracks to ArcGIS SHP format ExpertGPS makes it easy to update your GIS database with GPS data recorded in the field. Simply mark waypoints or record a tracklog on your Garmin nüvi 500, and then use ExpertGPS to upload your GPS data and export it as a shapefile. And you can Send GIS layers to your Garmin nüvi 500 as well. Using Garmin nüvi 500 Data in CAD Convert Garmin nüvi 500 waypoints and tracks to ACAD's DXF drawing format ExpertGPS allows you to convert your nüvi 500 tracklogs and waypoints to AutoCAD's DXF format in two easy steps. Send AutoCAD DXF to your Garmin nüvi 500 Download a fully-featured trial of ExpertGPS, or buy your copy today. We're so confident ExpertGPS will save you time (as a GPS data downloader, coordinate converter, map viewer and editor, and GIS, CAD, and GPS data converter) that we make this guarantee: if ExpertGPS doesn't pay for itself in 14 days, we'll refund your money - and you can keep the software! Get Started. Download Our Free ExpertGPS Trial Right Now! Download now and start your free trial of ExpertGPS 8.08 New features were added to ExpertGPS on March 21, 2022 ExpertGPS runs on Windows 11, 10, 8.1, and 7.
